

Exchange Program for Bilge alarms

DECKMA
HAMBURG

1. Technisch Bureau Uittenbogaart (TBU) supplies an exchange unit to your vessel. An invoice for the full amount of the unit will be issued on your account.

2. Once the exchange unit has been received by your vessel, your crew on board replaces the old device with the delivered exchange unit.

3. The crew returns the old unit to BV Technisch Bureau Uittenbogaart. Please, mark the package with our order reference and name of the vessel.

4. The returned unit will be overhauled and used as an exchange unit for the next customer. After inspection of the old device, a credit note will be issued to your account. The credit amount is the full cost of the exchange unit minus (-) the costs for overhaul.

- The exchange procedure is by far, the most economical way to be in compliance with the requirements of the MEPC.107(49) and the related MEPC.285(70).
- We can supply the exchange device directly to the vessel or to your forwarder.
- Exchange devices will be supplied together with all the required certificates.
- All exchange devices will be checked completely according our strict quality procedures.
- The crew can replace the unit without any special tools or knowledge; No authorised service technician required.
